

COLD SALT EQUINE HYDROTHERAPY SPA

EQUI-AID PERFORMANCE EQUIPMENT

EQUI-AID HYDROTHERAPY SPA IS A SELF CONTAINED UNIT, DESIGNED USING THE LATEST ENGINEERING SOFTWARE AND FABRICATION PROCESSES. IT IS CONSTRUCTED IN MODULAR FORM FROM A COMBINATIONS OF LASER PROFILED CNC BENT 316 MARINE GRADE STAINLESS STEEL AND ENGINEERING POLYMERS.

MANUFACTURED IN 3 SEPARATE PARTS THAT FIT TOGETHER TO FACILITATE EASY TRANSPORTATION AND

COLD SALT EQUINE HYDROTHERAPY SPA

TECHNICAL SPECIFICATION

Maximum load2500kg (5500lbs)

Fill/empty timesApprox 3minutes to max depth

Temperature rangeAmbient to 3 degrees C

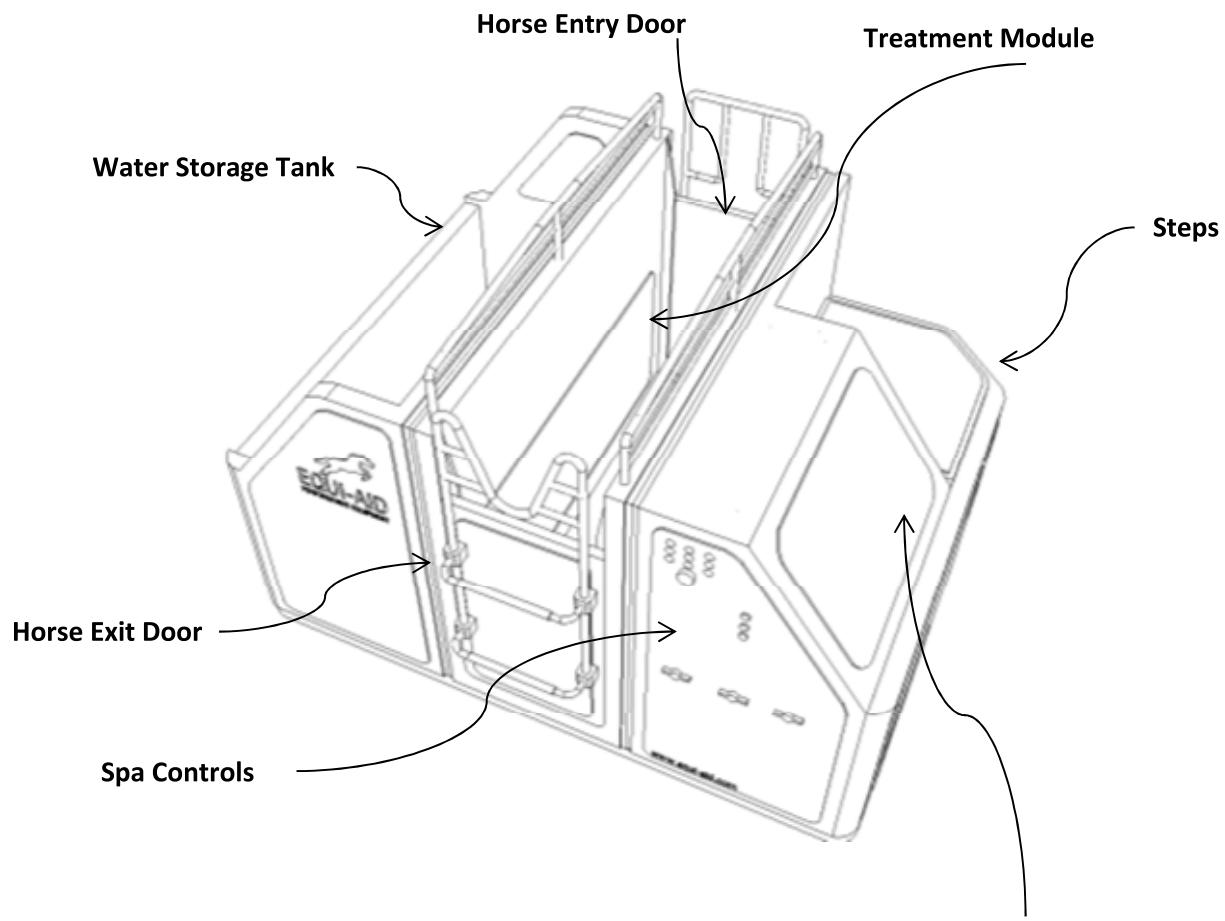

Complete System weightDry 1500kg (3307lbs) / Full 3500kg (7716lbs)

Capacity2000L 440 UK gals 520 USA gals,

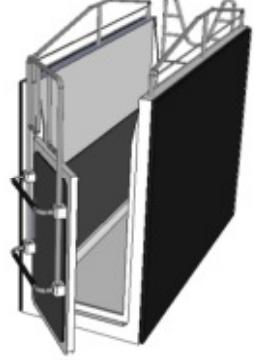

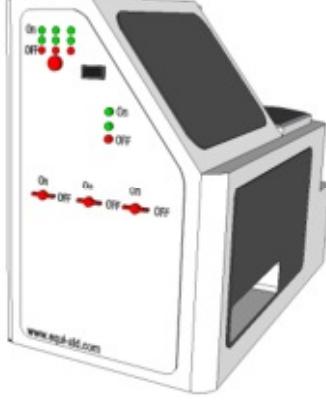

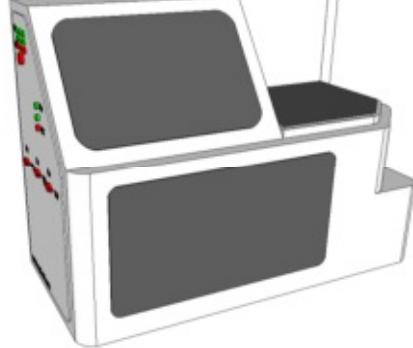

Power (17V AC Drive)400V 3 phase N. and Earth 50/60hz per phase

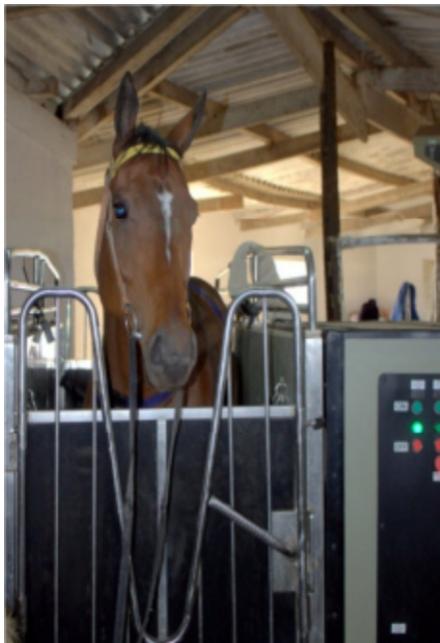

Power (17V AC Drive)220V single phase 50hz 16A

DimensionsL2.5m (8.2") x W 3.4m (11") x H1.75m (5.7")

COMPONENTS

<p>Water Storage Tank</p>  <ul style="list-style-type: none"> □ Polypropylene insulated water tank □ Hydraulic assist stainless steel hinged lid (carrying capacity 220kg) □ Laminated non clip rubber lid. □ Swivel cap inspection lid □ Holding capacity 2000l (520 USA Gal) □ 	<p>Treatment Module</p>  <ul style="list-style-type: none"> □ Marine grade Stainless steel frame □ Industrial grade non slip flooring □ Scratch proof, sound dampening polypropylene side walls. □ s/s safety rails with cross linked safety chain. □ Walkthrough operation
<p>Spa Controls</p>  <ul style="list-style-type: none"> □ Digital Temperature settings □ Fill, Drain, Waste Valve Functions □ Variable Speed Blower □ Emergency Cut-Off Switch (Shuts down all unit functions) 	<p>Pump & Chiller Module</p>  <ul style="list-style-type: none"> □ All pumps, extractor & cooling fans, and filters housed within the fabricated unit. □ Non slip stairs for easy access on both sides of the treatment tank.
